Agency. CDPHE

Purpose of Contact Confirmation sampling at 500-2

Discussion

At the area in IHSS Group 500-2 where chromium above action levels is present, an area approximately 3 feet by 3 feet by 6 inches deep will be excavated as described in the RSOP Notification #04-14. Confirmation samples will be collected from the side walls at the approximate midpoint of each side, from the full 6 inch depth of the excavation. These samples will be analyzed offsite for metals to determine if the remedial action is complete.

A confirmation sample in the center at the excavation depth of 6 inches is not required as this increment was covered by the initial sampling at this location.
